(54) COLOR EVALUATING DEVICE FOR COLOR
PICTURE

(57) Abstract:

PURPOSE: To realize adequate color decision by providing a display area limiting means to limit a display area on the screen of a color picture displaying means.

CONSTITUTION: The limiting control of the display area including area division is performed by an address designating part 21 using controller 15 control based on the operation of a keyboard 17, etc. The displaying position of picture data to be displayed on the screen of a color CRT 12 according to an address signal corresponding to the displaying position on the screen of the color CRT 12 is controlled through a frame memory 22. Next, the color picture of a shade guide from a hard disk memory 14 is displayed successively at every area-divided block on the screen of the color CRT 12. The color picture information of re-

spective shade guides is photographed previously by a color camera 11 in the same illuminating condition as the illuminating condition of the inside of the mouth of a patient, and stored together with respective shade guide numbers in the memory 14.
